

## Mae gan bawb ei ran i'w chwarae

Gall pawb chwarae ei ran trwy ddilyn y camau syml isod bob dydd:

**Lleihau** – meddwl am beth ydych chi'n prynu a dewis y cynnyrch â llai o ddeunydd pacio.

**Aildefnyddio** – eitemau y byddwch yn arfer eu taflu er enghraifft defnyddio tuniau bisgedi i storio pethau neu aildefnyddio poteli dŵr.

**Ailgylchu** – Erbyn hyn gellir ailgylchu'r rhan fwyaf o wastraff cyn i chi ei daflu i'r bagiau du. Yn gyntaf, edrychwch a ellir dilyn rhai o'r opsiynau ailgylchu mwy gwyrdd!

**Compostio** cymaint o wastraff ag sy'n bosibl – erbyn hyn mae'n hawdd compostio bwyd sydd dros ben trwy ddefnyddio'r gwasanaeth casglu gwastraff bwyd. Neu gallwch gompostio yn y cartref.

Erbyn 2025 bydd pob awdurdod sy'n bartner yn ymdrechu i gyflawni cyfradd gyfun o 65% rhwng ailgylchu a chompostio, gan gyflawni 5% ychwanegol trwy drin gwastraff gweddilliol.

Y Dewis Gorau gan Lywodraeth Cynulliad Cymru yw Ynni o Wastraff gan Gyfuno Gwres ac Ynni (llosgydd) ac mae'r cynigion sydd ar y rhestr fer ar gyfer y contract hwn yn cynnwys y math yma o dechnoleg.

Ynni Glan Llyn o Wastraff Colnbrook - Viridor  
 Lakeside Energy from Waste, Colnbrook - Viridor

## Everyone has a role to play

Everyone can play their part by following the simple everyday steps:

**Reducing** – think about what you buy and look for products with less packaging.

**Reusing** – items which you usually would throw away e.g biscuit tins as storage boxes.

**Recycling** – The majority of waste can now be recycled, before you throw it in the black bin, check to make sure it can't go into one of the greener recycling options!

**Composting** as much waste as possible – leftover food can now be easily composted via the food waste collection services, alternatively you can compost at home.

By 2025 each partner authority will strive towards a 65% combined recycling and composting rate, with an additional 5% recycling achieved through residual waste treatment.

The Welsh Assembly Government Preferred Solution is Energy from Waste with Combined Heat and Power (incineration) and the bids that have been shortlisted for this contract include this technology.
