

Garages plot and hard stand specification

Maximum Size Of Garage Plot:

4 m X 6.5 m

Size of garage structure:

Width – 3.0m (minimum) 3.8m (maximum)

Length – 6m (minimum / maximum)

An approximate 0.5 m gap is required between each garage.

Minimum specification for a standard single garage is walls of steel reinforced concrete panels with spar finish, galvanised corrugated steel sheet roof and a white powder coat primed galvanised steel up and over door. – **Subject to Planning Permission**

Before completing your plans please discuss with the Planning Department (they will discuss your plans with you free of charge) as a different design, including a pitched roof or roller shutter door may be required in certain areas.
